WHILE YOU'RE GETTING SETTLED...

In this class, we'll be using "Check-ins" on Canvas to take attendance. The check-in can be found on Canvas under this week's module.

Today's password is **syllabus**.

introductions

Who are we?

Anthony is your instructor.

We have an awesome TA and LAs.

- **Peter Gyory (TA) – Sections 12, 13, and 14**
- **Océane Andreis (LA) – Section 15**
- **Celine Nakpil (LA) – Section 11**

Who is
Anthony?

My background

- PhD in Information Science from CU Boulder (...soon!)
- MS in Information Science from CU Boulder
- MS in Information Sciences and Technology from Penn State
- BS in Information Sciences and Technology from Penn State

You want someone to convince you to stay in school forever? I'm your guy.

My partner (who is a CU alumna and Colorado native) refers to the Nittany Lion as the beanie baby that's been through the wash too often

What do I care about?

My research interests lie at the intersection of identity, algorithms, and experiences.

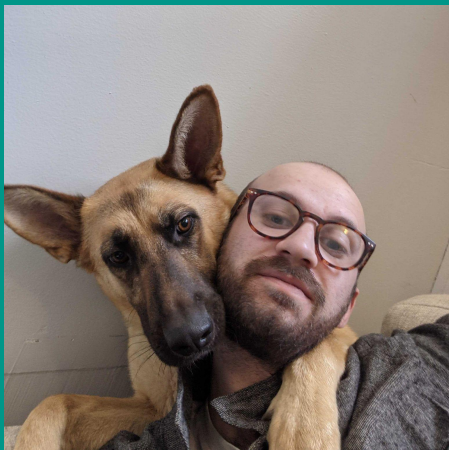

What does that actually mean?

I study break-ups, and how people's identities change (or don't) online after a break-up... and how those datafied identities are then leveraged by algorithms that sometimes make bad suggestions.

This means more broadly, I think data is important, and designing better systems is important.

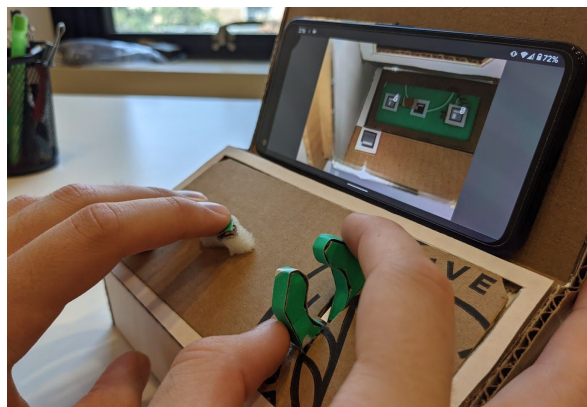

At home...

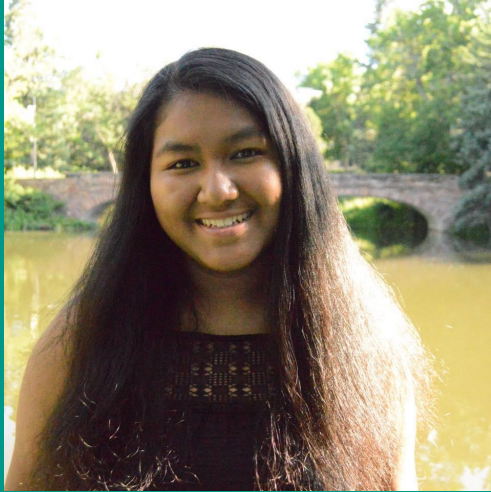

Peter
Gyory

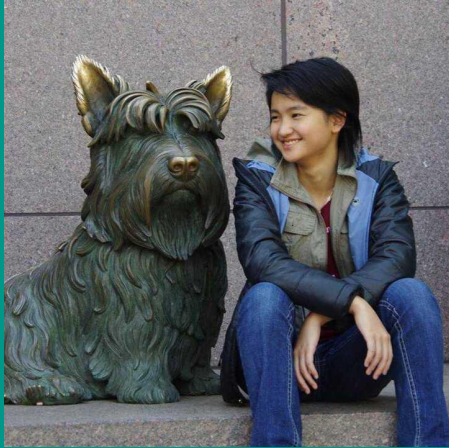

- Pronouns: He/Him/His
- Major: PhD in Creative Technology and Design
- Fun Facts:
 - Game Designer / Web Developer
 - I like to make things with weird controllers
EX a cardboard arcade for your phone
 - Obsessed with my dog (obviously)

**Océane
Andreis**

- Pronouns: She/her
- Major: M.S Creative Technology & Design (Social Impact)
- Fun Facts:
 - Obsessed with Sushi
 - French is my first language
 - 3rd semester being an LA for web
 - Tik Tok feed is 50% coding and 50% cooking

Celine Nakpil

- Pronouns: She/her/they/them
- Major: Creative Technology & Design
 - (UI/UX, Front-End Web Dev)
- Fun Facts:
 - Newbie LA
 - I love Jolteon, Shinx, Galarian Farfetch'd
 - Favorite meme: “Graphic Design is my Passion”

Working with Anthony

What to call Anthony

← This is Anthony

This is Dr. Pinter/
Professor Pinter →

I call him Dad, but
that'd be weird if
you did that.

Please just call me Anthony.

Communicating with Anthony

I get a lot of email.

Don't email me directly; **use Canvas instead.** I do not answer course related emails, so use Canvas.

I cannot guarantee a response to messages from Friday at 5PM through Sunday morning (so if you message me, I'll answer sometime on Sunday at the latest).

Otherwise, I will answer within 24 hours (and often sooner).

Communicating with Anthony

Same rules apply for Slack (when applicable). I answer within 24 hours, unless it's the weekend.

Meeting with Anthony

There is a link to information about my office hours on Canvas and in the syllabus.

You should stop by and say hi! I'm new to ATLAS, and I'd love to help you with your Web problems or hear about what you're interested in!

If my office hours don't work for you, message me and we can figure something out.

Quirks about working with Anthony

I'm really **good** with faces

I'm really **bad** with names

I will try very hard to learn your name, but **please don't be offended if I forget your name or misname you** (I have a lot of classes/students, which means a lot of names, which is sort of my worst nightmare).

Quirks about working with Anthony

Communication is key! I'm generally able to be flexible on things before they are due.

I cannot be flexible after the fact.

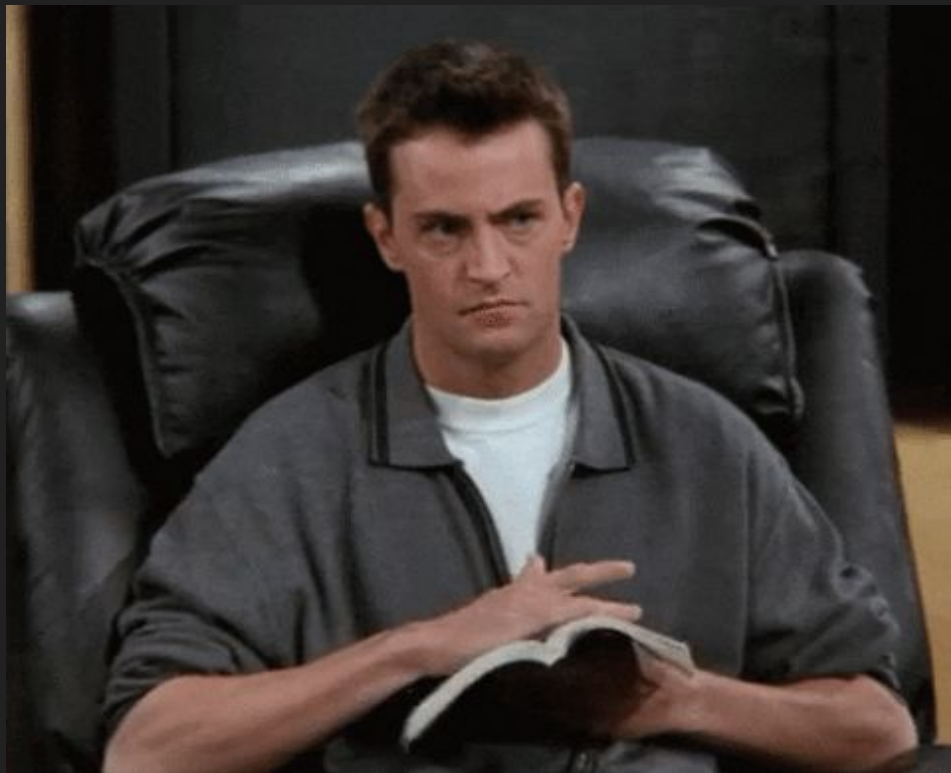

Please talk to me before deadlines if something has come up, and together we can have a discussion about how to move forward.

Quirks about working with Anthony

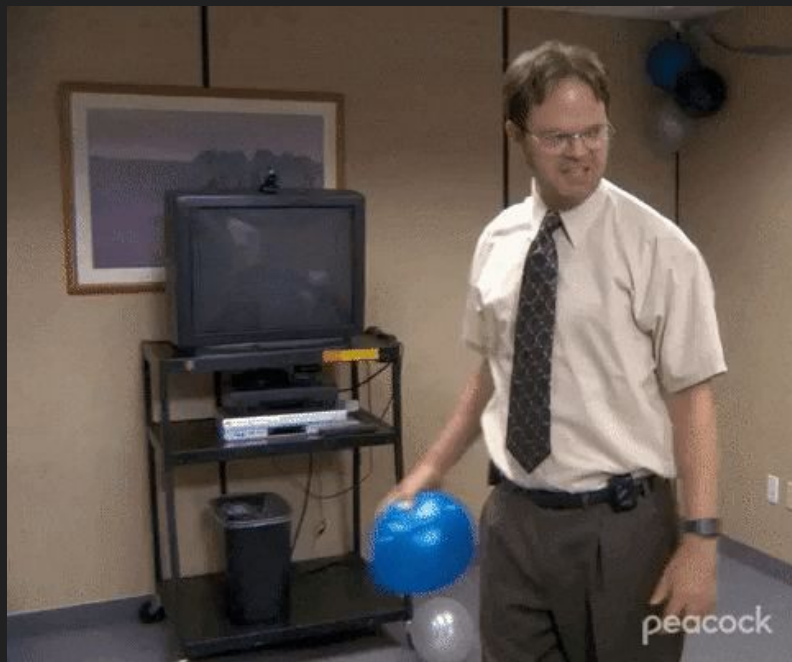

Please check the syllabus and other class materials before messaging me with a question

If I know the answer to a question is in the syllabus or other class materials, my response will simply say that

This doesn't mean I don't like you; I just get a lot of messages and I like efficiency

Quirks about working with Anthony

I generally come off as brusque and/or intimidating and/or “hard to read”.

Some of it is probably inherent to my physical presence -- I’m a big person.

I’m also Midwestern, so adjectives like *stoic* apply.

I want to let you know up front that this is all a facade, and that I deeply care about your success. So please don’t be afraid to get ahold of me or come to office hours.

Generally...

I'm very happy to (and in fact, mostly enjoy) talking about myself, my research, my career trajectory, my hobbies/personal interests, and generally anything...

...so please, feel free to ask!

I'm also happy to give you suggestions about your own academic and professional ambitions (but always with the caveat that you should talk to your advisor).

To conclude, here's my current favorite GIF.
(kudos if you know/can figure out what it's from)

the sauce

What are we going to learn?

In this course, we'll learn about:

- Hyper Text Markup Language (HTML)
- Cascading Style Sheets (CSS)
- JavaScript (JS)

...among others!

**WHAT IS
HTML, CSS,
JAVASCRIPT?!**

the tech

What tech are we going to use?

In this course, we'll use:

- Slack
- Github + GitHub Desktop + GitHub Pages
- Atom

...among others!

GitHub Pages

<https://pages.github.com>

logistics

How are we gonna do all of this?

Let's have a look at Canvas and the syllabus.

roadmap

syllabus

WHAT'S NEXT?

Thursday Recitations!

- Check over the syllabus and Canvas, and come with any questions
- Assignment 1 – Technology Onboarding (have a look at this before your recitation)

Upcoming Due Dates

- Assignment 1 – due Sunday, 11:59PM MT

DAILY NOTE

We'll use daily notes as a time to pause and reflect on the day. It gives you some time to deepen your learning, and gives us some feedback too.

daily note

<https://bit.ly/atlas2200-lecture-01>

Have questions? Feel free to stick around.
Otherwise, we'll see you Thursday in recitation!
